

ROC FINISH

FLOOR CARE

PRODUCT DESCRIPTION

Roc finish is a very hard mono-component water-based emulsion designed to protect floors and to help in their upkeep.

Roc finish is formulated for use on concrete and paving.

COVERAGE

Approximately 1 litre for 10 m² (minimum two layers).

TECHNICAL SPECIFICATIONS

Aspect: Milky white liquid

Density: 1.1 ± 0.1

Non-flammable

pH: 8.0 ± 0.1

Application temperature: 5 to 30 °C

INSTRUCTION FOR USE

- On surfaces consisting of **Roc cure**, strip this using **Roc decap**.
- On surfaces free of any treatment (curing products, wax or similar), neutralised using **Roc neutre**, apply one coat of **Roc finish** using an application sleeve or airless spray;

Wait for this coat to dry completely before applying a second layer for a satin finish.

Can be walk on after 24 hours at 20 °C

Fully useable after 36 hours at 20 °C

Roc neutre with daily upkeep, and **Roc polish** with weekly or monthly depending on conditions are particularly adapted to make the treatment with **Roc finish** more durable.

PACKAGING

20 litres drum.

The product can be stored one year in its original container, kept in a closed place and protect from frost.

HEALTH AND SAFETY

Non dangerous good.

Refer to our safety data sheet.
